

I am a truck driver I use the weather an road report that XM provides every day . The XM report is more acturate and upto date then any other service. By using this service XM has saved my self and others valuable time and fuel by finding other routes to my destinations . I have tried using local stations and find that if I am not familiar with the area I have not idea what they are talking about. If you choose to remove this very valuable service from XM then you will be doing the general public a disservice by creating more road jams and not to mention the greater chance of accidents . thanks and have a safe an happy day!
